REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: None of the prior art teaches or suggests the claimed invention. While De Strycker et al. teaches determining a visual model of the cover image to derive a carrier for information to be embedded into the image, this analysis is performed on the *image* rather than the *receiver* on which the image is to be placed. De Strycker et al. does not suggest determining information related to a physical characteristic of the *receiver*, as required by the claims. Smith teaches determining information related to a physical characteristic of a receiver, but uses this information to generate a hash value that is used as part of the embedded content information. Smith fails to suggest that the information related to a physical characteristic of a receiver be used to provide a carrier that is used with a second carrier that is randomly generated, as claimed. Therefore, the claimed invention is allowable over the prior art..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Claims 1-8 are allowed.
